PROFESSIONAL SUMMARY

Implementation Consultant with a Computer Science background and a practical focus on SaaS and EdTech workflows. Connects user and business requirements with process mapping, configuration, data validation, stakeholder coordination, and hands-on web product development. Focused on systems that are easier to adopt, operate, and improve.

CORE STRENGTHS

IMPLEMENTATION & DELIVERY - Requirements understanding, workflow mapping, onboarding support, issue investigation, user experience improvements, and cross-functional coordination.
PRODUCT & SYSTEMS - Academic operations, student/faculty workflows, timetable constraints, results processing, data imports, reporting, and validation.
DEVELOPMENT - React, JavaScript, Vite, Node.js, Express, REST APIs, MongoDB, HTML, CSS, Git, deployment workflows.

SELECTED PROJECTS

Scheduly - Timetable Generator

Full-stack academic scheduling concept with program/semester mapping, faculty/section/room conflict rules, holiday-aware scheduling, publishing, and role-specific timetable portals. React, Node.js, Express, MongoDB.

Result Generator / Academic Workflows

Education workflow app covering student/faculty records, marks imports, SGPA/CGPA calculations, rank lists, and result publishing. React, Express, MongoDB.

My Specs Store

Eyewear storefront with product catalogue, cart, checkout journey, and online/COD ordering direction; focused on product discovery and purchase flow.

Business websites - The Detailing Shelter & Tatvam Vastu

Customer-facing website projects focused on brand-aligned presentation, service information, and responsive page structure.

EDUCATION & APPROACH

B.Tech - Computer Science & Engineering
Understand the real workflow -> map requirements and constraints -> build a usable solution -> test practical scenarios -> refine with feedback.

TECHNICAL TOOLKIT

Frontend: React, JavaScript, HTML, CSS, Vite | Backend: Node.js, Express, REST APIs
Data: MongoDB, spreadsheets, validation workflows | Delivery: Git, GitHub, Vercel, Render
